

DJI TERRA

Make the World Your Digital Asset

Plan. Process. Analyze and Execute.

Capture, analyze and visualize your environment with DJI Terra – an easy to use mapping software developed to help industry professionals transform real-world scenarios into digital assets.

Mission Planning

Data Acquisition

Area Mapping

Data Analysis

Digitize the World Around You

Public safety

Achieve rapid turnaround time for gathering on-site critical information

Construction

Collect, measure and analyze data with accuracy across projects

Infrastructure

Easily perform detailed inspections on complex assets and structures

Agriculture

Get an in-depth understanding of your field to help you generate greater yields

Filming

Optimize previsualization to improve planning workflows across your team

Mission Type

Waypoints Mission Planning

Create efficient flight paths using predefined waypoint actions and adjustable parameters like altitude, speed, gimbal pitch angle, aircraft heading and more. For more complex and tight missions that require high attention to detail, use 3D Flight Visualization to design and simulate tasks on existing 3D models.

Area Mission Planning

With just a few taps on the screen, you can automate complex missions, allowing you to seamlessly capture imagery which can be processed to produce a variety of maps and models for further analysis, and to aid decision-making.

Oblique Mission Planning

When accuracy is essential and details are vital to your critical operations, Oblique lets you capture a rich 3D model data set by adjusting the angle of the camera at a tilted angle, giving you an extra crisp view of the asset.

Mapping

Real-time Mapping

With real-time mapping, you can quickly generate a 2D orthomosaic of the selected area of the flight mission in real-time. Not only is this ideal for creating detailed flight paths in remote areas but it's also useful for time-sensitive missions that require quick decision-making on site.

High-res orthomosaic

2D reconstruction

Generate high resolution orthomosaic, enabling you to get detailed and accurate measurement results for all your critical projects.

3D reconstruction

Get sharp and realistic representations of your surroundings throughout various industrial applications, be it accident reconstruction, tracking progress on major construction projects and more.

Data Analysis

Annotation

Edit labels of measurements on existing models, which can be used for reporting and improving communication throughout ongoing projects.

2D & 3D Measurements

Acquire key dimensions across an array of terrains with easy-to-use analysis tools that enable you to obtain a variety of measurement data based on linear, area and volumetric measurements.

Photo Inspection

Closely inspect every photo of the model so you can pinpoint and highlight any critical elements in the real world.

Seamless Connection with Your Fleet of DJI Drones

DJI Terra is compatible with the following Phantom 4 Series drones:

Phantom 4 RTK, Phantom 4 Pro V2.0,
Phantom 4 Pro + V2.0, Phantom 4 Pro,
Phantom 4 Advanced and Phantom 4.

The Beginning of Next Generation Mapping Solutions

Harness the power of AI-driven mapping solutions designed to take your industrial projects to the next level. Be it object classification, site inspections and more, you can start developing task-specific mapping solutions to seamlessly carry out missions.

1 Data acquisition

Define mission objective, plan desired flight plan, and with a tap of a few buttons, autonomously collect critical data so you can achieve the required outcome.

2 Data Processing

Utilize refined image recognition technology to generate 2D and 3D data, resulting in a more realistic representation of your assets, objects, surroundings and more.

3 Data Application

Implement tools and machine learning techniques, which can be used across a variety of different industries – like classification algorithms for identifying trees, objects, and other scenarios.

4 Execution

Take the required action, and enjoy more efficient processes with machine control – be it automated crop spraying, monitoring work sites, transporting materials and more.

Terra License Plans

Feature / Version	Advanced	Pro
Real-time 2D Mapping	✓	✓
Agricultural application	✓	✓
KML file import	✓	✓
2D Reconstruction (Field)	✓	✓
2D Reconstruction (Urban)	✓	✓
3D Reconstruction		✓
3D Mission planning		✓

Streamline Your Operational Workflows

Terra is available for order through official DJI Dealers. For more information, please visit our website at www.dji.com/dji-terra.

About DJI Enterprise

DJI Enterprise is a global team dedicated to developing world class drone solutions for a new generation of work. These solutions help businesses across agriculture, infrastructure, public safety sectors and more to empower workers, enhance jobs and digitize operations.
