

## TH4 Use tutorial

Power on the hook can be used, the screen display flashing "8".

1. you need to press the right button to reset, and the screen will display "0" with a "Tick" sound.
2. After the reset is successful, press the left button, and the screen will display "1", then the hook can be hung items in No. 1.
3. After hanging all the items, finally press the right button to confirm the mount is successful, at this time the screen shows "三", you can start to use.

**Warning:** After the item is mounted, it is necessary to confirm the initial state of the throwing hook before continuing operation. If there is an object, the throwing hook can be adjusted to the initial state by hand before continuing operation.
